

2005 VICTORIAN LOCAL GOVERNMENT ELECTION RESULTS WHERE GREENS WERE CANDIDATES

These results show 2005 Local Government election results where Greens stood as candidates. Final figures were taken from the VEC website in January 2006 and include all recounts.

Council / election type	Election type is either attendance (like State or Federal elections) or postal (like Victorian Green internal elections).
Wards contested	Wards contested show the number of wards with endorsed Green candidates and the total number of wards comprising the Council area.
Candidates in ballot order	Candidates are listed in the order they were on the ballot papers provided to voters.
Endorsement / Elected?	Endorsement indicates where endorsed by the Greens. Other party endorsement is not indicated for legal reasons.
Grn Pref	Green preferences shows the preference recommendations of Green candidates.
1st Pref	This is the number of formal first preference votes achieved by each candidate.
% vote	This is the percentage of formal first preference votes achieved by each candidate (calculated as a percentage of formal votes).
Vote Rank	Ranks candidates according to their formal first preference votes. It does not show the candidates final rank after preference distribution.
≥ 4%	A ✓ indicates the candidate equals or exceeds a 4% primary vote, which is the threshold for return of their nomination fee.
Final vote	The VEC provides final votes in many instances where single candidates are elected. These figures help display how close many elections are.
# on Roll	The total number of voters recorded on the electoral roll for the division.
Voter Turnout	The number of voters that actually voted.
Formal Votes	Votes complying with the rules that are included in the count.
Informal Votes	Votes not complying with the rules that are excluded from the count, and so not used in further counting to determine the election outcome.
